DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 15 October 2003 has been entered in which claim 16 was amended, claims 27 and 28 were added and claims 1, 5, 8-15 and 17-26 were cancelled. Claims 16, 27 and 28 are pending.

Drawings

1. The replacement drawing was received on 15 October 2003. This drawing is not acceptable. The drawing needs to be in black ink.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 16 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Lia, U.S. Patent No. 5,222,477.

Lia discloses in figs. 2, 4, and 6 a light shield plate (27) which is fitted in the optical path of image light of a video camera (21) having one image pickup element (22) and guides an

Page 3

image light for a left eye and an image light for a right eye to which an appropriate visual angle is given (column 3, line 60-column 4, line 19) to said image pickup element, to thereby pick up a stereoscopic image by said video camera (column 3, line 60); wherein said light shield plate has two openings (28, 29) defined therein so that one light that has passed through one of those two openings in said light shield plate becomes the image light for the left eye (figs. 4 and 5), and the other light that has passed through the other opening in said shield plate becomes the image light for the right eye (figs. 2 and 3); and wherein a shutter plate (30) through which light does not pass and which is disposed as to be movable forward and backward in an optical path of the left eye light or the right eye light is disposed in each of the openings (column 3, line 60-column 4, line 19, figs. 2 and 4), wherein the light shield plate is a component of one objective lens system (25) that allows the image light for the left eye and the image light for the right eye to pass, wherein the objective lens system and the light shield plate are integrated with each other (figs. 2, 4 and 6).

Regarding claim 28, Lia further discloses wherein the light shield plate comprises liquid crystal plates for each of the image lights for the left and right eyes (column 4, lines 8-10).

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/903,210

Art Unit: 2872

5. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lia in view of Mihalca et al., U.S. Patent No. 5,964,696.

Lia discloses the claimed invention except wherein the light shield plate comprises polarization plates for each of the image lights for the left and right eyes. Mihalca et al. teach a device for picking up a stereoscopic image (fig. 2) comprising one image pickup element (14) to which an image light for a left eye and an image light for a right eye are guided for picking up an image for the left eye and an image for the right eye which are used as a stereoscopic image and given an appropriate visual angle (column 3, lines 26-33) wherein a light shield plate (figs. 4 and 4A, 46) comprises polarizing plates (54, 56) for each of the image lights for the left and right eyes. It would have been obvious to one of ordinary skill in the art at the time the invention was made to replace light shield plate of Lia with the polarizing plates of Mihalca et al. to provide a compact device with better stereoscopic properties like perceiving depth (column 3, lines 55-59).

Response to Arguments

6. Applicant's arguments filed 15 October 2003 have been fully considered but they are not persuasive.

Applicant argues Lia does not disclose a light shield plate and an objective lens system that are integrated with each other. The examiner respectfully disagrees. Merriam-Webster's Collegiate Dictionary, Tenth Edition defines integrated as "to form, coordinate, or blend into a functioning or unified whole. In figs. 2, 4 and 6, Lia discloses a light shield plate (27) and an objective lens system (25) that are coordinated to function together, i.e. integrated, within the tip (12) of the system to provide an image light to the image pickup element (22).

Art Unit: 2872

7. It is noted by the Examiner that the objection to the specification made in the previous

Office Action has been withdrawn due to amendment by the Applicant.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Lee Fineman whose telephone number is (571) 272-2313. The

examiner can normally be reached on Monday - Friday 7:30 - 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Drew Dunn can be reached on (571) 272-23124. The fax phone number for the

organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 305-4900.
